

Year 2 – Animals Including Humans

Key Facts

All animals need three basic things to stay alive:

air

water

food

Being active and exercising keeps our body and mind healthy.

Key Vocabulary

adult

A fully grown animal or plant.

develop

To grow bigger, better and become stronger.

diet

The food and water that an animal needs.

disease

Any harmful change from normal e.g. An illness or sickness.

exercise

An activity taking effort to sustain or improve health and fitness.

germs

Very tiny living things that can cause disease.

hygiene

Things you do to keep yourself and around us clean to reduce germs and stop them spreading.

life cycle

The changes all living things go through to become an adult.

live young

Offspring that has not hatched from an egg.

nutrition

Food we need to live.

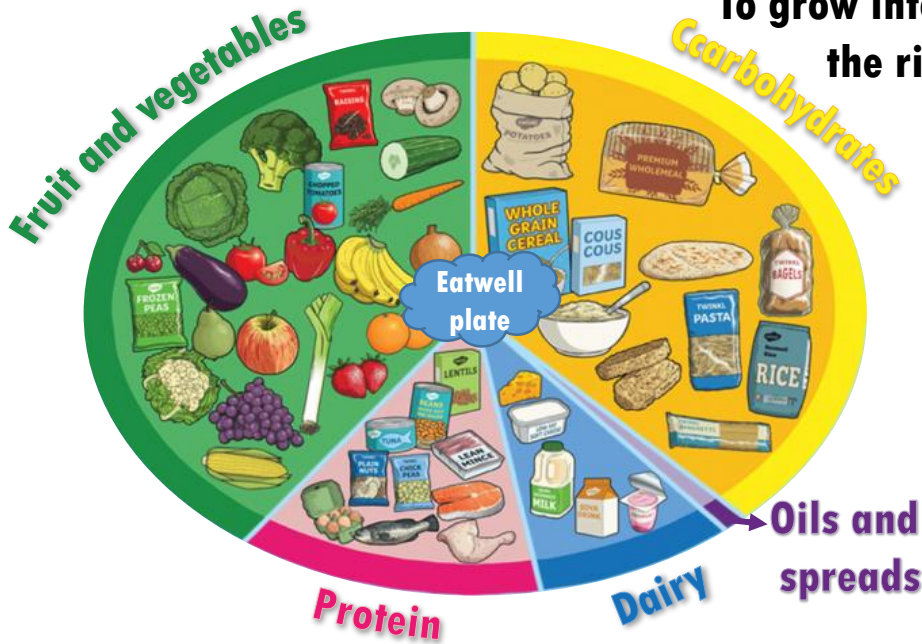

offspring

The child of an animal.

pulse

The beating of the heart that can be felt in your neck and your wrist.

To grow into healthy adults we need to eat the right foods in the right amounts.

Hygiene is important for staying healthy.

Some animals give birth to live young.

Some animals lay eggs which their young hatch from.

Some offspring look like their adult parents.

Some offspring look different to their parents.
